

Passionate and adaptable Web Developer with 8 months of experience building responsive, user-friendly web applications using JavaScript and modern technologies. Quick learner with a focus on team success and quality results. Eager to grow technically while contributing meaningfully to organizational goals.

EDUCATION

Bachelor of Technology (CSE), United Institute of Technology 75 %	2020 - 2024
Higher Secondary (XII), Allahabad Intermediate School 65 %	2020
Secondary (X), Hilton Convent Sr Sec School 82 %	2018

COURSE WORK

• Data Structures and Algorithms (DSA)	• Database Management System (DBMS)	• OOP Concepts • Software Engineering	• Web Development
--	-------------------------------------	--	-------------------

SKILLS

Languages:	Python, C++, JavaScript, SQL, PHP, Java
Technologies/Frameworks:	HTML5, CSS3, TailwindCSS, ReactJS, React-Native, NodeJS, MongoDB, ExpressJS, NextJs, Pandas
Developer Tools:	VS Code, PyCharm, Github, Figma, Postman

EXPERIENCE

AlignBooks Info Solution Jr. Software Developer	Sept 2024 - Present Noida, UP
- Architected the AlignBooks official website, resulting in a 90% satisfaction score from users, optimized cross-device compatibility for a faster, more consistent user experience. Redesigned and enhanced the UI, implementing mobile-first architecture and responsive layouts, while ensuring high performance across devices through continuous testing and tuning. Implemented smart frontend caching by storing API data on initial load and serving it on repeat visits, resulting in up to 40% faster load times and significantly improved responsiveness. - Forged a comprehensive Learning Management System (LMS) for the AlignBooks Learn portal, integrating personalized onboarding and module locking, resulting in 30% faster training completion times. - Delivered a responsive and accessible Help/Learn portal using modern UI/UX principles and structured learning paths, improving the support experience for both new users and partners. - Developed features based on real user feedback and evolving product requirements, collaborating closely with UI/UX designers and QA teams to ensure timely, high-quality releases. - Currently leading the frontend development of FCA Integral's corporate website (AlignBooks' parent company), focusing on modern UI, scalable architecture, and seamless cross-platform compatibility.	

PROJECTS

Elegant Journeys - Tour & Travel Website <u>HTML, Bootstrap, Javascript, EmailJS, Responsive UI</u> Link	2024
- Designed and developed a responsive tour and travel website for a client, showcasing destinations, packages, and booking forms. - Integrated contact and enquiry forms using EmailJS for real-time lead capture. - Ensured mobile responsiveness, SEO-friendly structure, and cross-browser compatibility.	
Waste Management System using IOT and ML <u>Arduino, Sensors, NodeMCU, AI/ML</u>	2023 - 2024
- Developed a smart bin that provides real-time fill-level data using sensors. - Implemented ML-based route optimization to calculate the shortest path for garbage collection trucks. - Enabled automated alerts and notifications for waste management authorities.	
Cab Booking Application <u>ReactJS, Node.js, Socket.io, MongoDB, Redis, JWT</u> Live Demo	2024
- Built a full-featured Uber-style cab booking web app with real-time ride tracking, separate user/driver dashboards, and Stripe payment integration for secure transactions. - Optimized and maintained a performance-aware cab booking system with caching strategies to reduce server load and improve user experience, demonstrating strong focus on software optimization and maintainability.	

EXTRA CURRICULAR

- Awarded 1st Prize in a Science Exhibition for innovative project work.
- Published a research paper in Springer IEEE Xplore titled "Smart Waste Management System using IoT and ML."
